Jamnagar, Gujarat, India

EDUCATION

Charotar University of Science and Technology (CHARUSAT)

B.Tech, Computer Engineering

June 2023 - June 2027

Anand, Gujarat

SKILLS

- **Languages & Core:** Java, Python, JavaScript, Data Structures & Algorithms
- **Frontend Technologies:** Html, CSS, Figma, React.js
- **Backend Technologies:** Node.js, Express.js
- **Databases:** MySQL, MongoDB
- **Development Tools:** Git, GitHub

CERTIFICATES

- **Data Structures and Algorithms with Java:** NPTEL (National Programme on Technology Enhanced Learning)
- **Introduction to Java Programming:** Infosys Springboard
- **Python Programming:** Hacker Rank (Basic Level Certificate)

PROJECTS

QueryCraft – Online Doubt Solving Platform

November 2024 – March 2025

Technologies: MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Built a full-stack web application to facilitate real-time doubt solving between students and faculty.
- Designed intuitive and responsive UI using React.js, allowing users to post, browse, and respond to doubts.
- Developed backend RESTful APIs using Node.js and Express.js for user authentication, question-answer handling, and admin management.
- Used MongoDB to store user profiles, doubts, answers, and session data.
- Implemented features such as role-based login (student/faculty), dashboard, notifications, and filtering of doubts by subject or status.

MyHostelPal - Hostel Governance Website

June 2024 – September 2024

Technologies: HTML, CSS, JavaScript, PHP, MySQL

- Developed a full-stack web application to streamline hostel management and improve transparency between students and administration.
- Implemented features like hostel listings with filters, detailed hostel pages, user authentication, review system, and booking management.
- Integrated MySQL database for storing hostel details, user data, and reviews.
- Designed an intuitive and responsive user interface using HTML, CSS, and JavaScript.
- Backend logic handled using PHP to manage user sessions, bookings, and data processing.

TrackMyClass - Student Attendance System

January 2024 – March 2024

Technologies: Python, Django, Html, CSS

- Developed a web-based attendance management system for academic institutions using Python and Django framework.
- Implemented role-based login system for admins, faculty, and students.
- Enabled faculty to mark attendance, view student lists, and generate attendance reports. Designed models for students, courses, classes, and attendance records using Django ORM.
- Designed models for students, courses, classes, and attendance records using Django ORM.
- Created user-friendly templates with Django's templating engine and Bootstrap for responsive UI.
